INTELLIGENT DETECTION SOLUTIONS

YUMAIN, FOR YOUR SAFETY AND PRODUCTIVITY

YUMAIN solutions are exclusive **event detection systems** based on image analysis using **artificial intelligence** (AI). The efficiency, robustness and performance of our solutions are based on a solid trio of expertises: real-time signal processing, the use of embedded AI (Edge-computing), and information acquisition in industrial environments.

P O S S I B L E APPLICATIONS

AUTOMATIC PANTOGRAPH DETECTION AND ANALYSIS

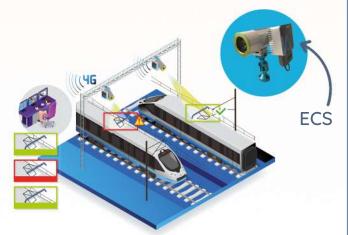

PREVENTING PEDESTRIAN/VEHICLE COLLISIONS

SECURING AREAS

Rail and Tramway

Pantograph Monitoring System (PMS) for trains/trams

YUMAIN's **ECS** helps maintenance managers to ensure the **reliability** and **safety** of their trains/tramways by detecting, **in real time** thanks to **on-board AI**, signs of damage to pantographs as they pass under the camera.

Our dedicated data management tool

Our ECS **automatically** sends the slightest sign of anomaly to our dedicated **ECS-View** tool, easily accessible by our technical teams. This enables **targeted**, **proactive** intervention, significantly **saving time** and **boosting productivity**.

Industrial safety

Collision prevention & Site security

YUMAIN'S ECS helps QHSE managers keep their sites **safe** and **productive** by **detecting** potential collision hazards in sensitive areas in **real time**, thanks to **on-board AI**.

It is also capable of providing **area security** and **perimeter protection**.

Customized studies

Thanks to its expertise and **neural** technology, YUMAIN is able to carry out studies and provide customized AI signal processing solutions.
